

# Q2 2026 External Pentest Remediation Status

## Metadata

|                  |                                             |
|------------------|---------------------------------------------|
| Report Name:     | External Network Penetration Test - Q2 2026 |
| Assessor:        | SecureCo Consulting                         |
| Assessment Date: | 2026-04-15                                  |
| Report Date:     | 2026-06-15                                  |
| Author:          | Security Team                               |
| Scope:           | External-facing web applications and APIs   |

## Remediation Status

| Severity | Total | Fixed | Pending | % Complete |
|----------|-------|-------|---------|------------|
| Critical | 2     | 1     | 1       | 50%        |
| High     | 5     | 4     | 1       | 80%        |
| Medium   | 8     | 8     | 0       | 100%       |
| Low      | 12    | 12    | 0       | 100%       |
| Total    | 27    | 25    | 2       | 92.6%      |

## Pending Items

| ID          | Title                                  | Severity | Owner         | Target     | Status                 |
|-------------|----------------------------------------|----------|---------------|------------|------------------------|
| PENTEST-001 | SQL Injection in Search API            | Critical | Platform Team | 2026-07-01 | In Progress<br>Blocked |
| PENTEST-003 | Missing Rate Limiting on Auth Endpoint | High     | API Team      | 2026-07-15 |                        |

## Compensating Controls

### CC-001: WAF SQL Injection Rules

ModSecurity rules deployed to block common SQL injection patterns.

Implemented: 2026-04-20

Effectiveness: High - blocks 99% of known attack patterns

## Next Milestones

| Phase | Title                         | Target Date | Owner         |
|-------|-------------------------------|-------------|---------------|
| 1     | Critical Findings Remediation | 2026-07-01  | Platform Team |
| 2     | High Findings Remediation     | 2026-07-31  | Security Team |
